

1           **ABSTRACT OF THE DISCLOSURE**

2           A casing has a hollow body, at least one wheel holder and at least one  
3        wheel. The body has at least one cavity to respectively receive the at least one  
4        wheel holder. Each wheel is rotatably mounted on one of the at least one wheel  
5        holder. With the arrangement of the at least one wheel, the casing can be  
6        transported conveniently and easily.
